

Softener and Sour

Concentrated Softener and Sour

Product Number 4193

Description

An institutional liquid designed to leave fabrics soft and pliable while neutralizing residual alkalinity, thus preventing bed sores or skin irritation. A must for nursing homes, hospitals, shirt laundries, uniform washing, or any application where a high alkaline detergent is used. This highly concentrated formulation reduces the excess packaging needed with less concentrated products.

Directions

Designed only for use in the ConQuest system. Our easy to handle container is designed to eliminate the difficulties associated with the handling of heavy pails and drums.

Slide the lever to "Open" on the ConQuest rack. Remove empty container from rack and dispose of properly. Secure the desired replacement container from storage. Remove shipping cap from container. Place container into a properly marked ConQuest rack, making sure that product is placed into the correct slot. Push gently so that the product container engages the top portion of rack and that it will not move any further. Slide lever to "Close". Product is now ready to dispense.

Your service representative will set the concentration to match your needs. Typical usage is .5 – 1 ounces per 50 pound load.

Technical Data

Form	Liquid	Rinsability	Excellent
Color	Pink, Opaque	pH (1% solution)	3.0-3.5
Scent.....	Pleasant	Viscosity	Medium
Biodegradable.....	Yes	Density	8.75 lbs./gallon

Product Category: Conquest System/Laundry

DOT Shipping Name: CORROSIVE LIQUID, ACIDIC, INORGANIC, N.O.S., (CONTAINS PHOSPHORIC ACID), 8, UN 3264, II

Cautions

Contains phosphoric acid and hydroxyacetic. Causes skin and eye irritation. Do not ingest or allow contact with skin or eyes. If ingested: Drink plenty of water and get medical attention immediately. Do not induce vomiting unless instructed by a physician to do so. Never give fluids to an unconscious person. In case of eye contact: If contacts are worn, remove them, then raise eyelids and flush eyes with clear water for 15 minutes making sure to flush under eyelids. Get medical attention immediately. In case of skin contact: Remove contaminated clothing. Flush skin areas with clear water, then wash with a mild soap. If irritation occurs, get medical attention. In case of inhalation: Move victim to fresh air. Get medical advice. Refer to your Material Safety Data Sheet for additional cautions and handling procedures.
