

All Temp Detergent

Mechanical Dish Detergent for All Temperature Ranges

Product Number 4736

Description

Utilizing the latest advances in formulating technology, we have designed a product that can be used in high and low temperature applications as well as hard and soft water. Helps to minimize your delivery and inventory costs as well as storage space. Quickly emulsifies greasy soils for easy removal. Rinses quickly and easily from surfaces.

Directions

Designed only for use in the ConQuest system. Our easy to handle container is designed to eliminate the difficulties associated with the handling of heavy pails and drums.

Slide the lever to "Open" on the ConQuest rack. Remove empty container from rack and dispose of properly. Secure the desired replacement container from storage. Remove shipping cap from container. Place container into a properly marked ConQuest rack, making sure that product is placed into the correct slot. Push gently so that the product container engages the top portion of rack and that it will not move any further. Slide lever to "Close". Product is now ready to dispense.

Your service representative will set the concentration to match your needs. Typical usage is 3 – 4 ml. per cycle.
