

EcoFirst Safe Soak

Environmentally Preferred Solid Flatware Presoak & Detarnisher

Product Number 4643

Description

This product utilizes the latest ingredients that are less hazardous to environment without sacrificing performance. This unique solid product provides effective and economical presoaking of kitchenware and cuts down wasted product. Our dual purpose product is also effective in detarnishing silver! Enzyme fortified to quickly soften the toughest food soils from kitchenware and flatware prior to mechanical washing. For use on flatware, silverware, pots, pans, utensils, and many other kitchen items. Safe on soft metals. Works in all water conditions. Does not contain phosphates or NTA. Shipping container has an easy lift handle for placing jar into dispenser. EPA Safer Choice certified.

Directions

This product should be dispensed only from equipment designed specifically to handle solid capsule detergents. Remove cap and place inverted capsule into bowl unit. Set the detergent timer to flush an adequate amount of water to flush against block and flow into presoak tub/tray. For consistent feeding of product, it is suggested that cold or warm water is used to dissolve product. Typical usage is ½ to 1 ounce per 3 gallons of water. Fill the remainder of the soak pan with warm water. Place flatware into pan and allow soaking until soils have been loosened. **For detarnishing, place a piece of aluminum foil to cover bottom surface of soaking tray.** Rack flatware and rinse with water from sink to remove excess detergent, and then wash as usual in mechanical washer. For pots and pans that require extra soaking, direct detergent solution into sink and fill with warm to hot water. Place pots and pans into sink and allow soaking until the soils can be easily removed.

Technical Data

Form.....	Solid	Foam.....	Low
Color.....	Green	pH (1% solution).....	9.7-11.0
Scent.....	None	Phosphated.....	No
